RegioData Purchasing Power United Kingdom 2012

verifiziert von: RegioData Research GmbH

RegioData Purchasing Power Indices clearly represent the regional prosperity level of a country. Purchasing Power refers to the ability of one person or one household to buy goods, services or rights with a given amount of money within a certain period of time. The data refers to the disposable income including primary and transfer income of the population (taxes, insurance expenses and other compulsory contributions are deducted).

Article Search API - NYTimes.com

Offsite

With the Article Search API, you can search New York Times articles from 1981 to today, retrieving headlines, abstracts, lead paragraphs, links to associated multimedia and other article metadata. Along with standard keyword searching, the API also offers faceted searching. The available facets include Times-specific fields such as sections, taxonomic classifiers and ...

Richard Nixon - Presidential Recordings

Offsite

Between February 18, 1971 and July 18, 1973 Richard Nixon secretly recorded roughly 3,700 hours of conversations and meetings in five different locations. With the exception of the manually-operated equipment in the Cabinet Room, Nixon's recording system was sound-activated and recorded a wide range of conversations of varying audio and substantive quality. The original ...

Measuring Worth: A collection of calculators to help answer questions of Comparative Relative Value

Offsite

Have you ever wondered what the price of gold was in 1907? Or what the GDP was in 1932? Presented here are many useful historic data sets that we developed in order to answer such questions. Some of these are currently hosted on EH.Net. The Annual ...
