

Hanley Energy

Hanley Energy is a globally recognized award winning innovator headquartered in Co. Meath, Ireland. Committed to excellence in engineering and customer service, and with branch offices in Germany, the US and Sweden, we supply, design, install and support data centre control, critical power and energy management solutions for a range of Irish and international clients in a variety of business sectors.

In Ireland and mainland Europe, Hanley Energy's ongoing work for a tier 1 data centre client involves deploying their critical power solution, changeover controls and data centre information management systems. We are currently activating around 2-3MW of UPS every month in our customers data halls – over the past three years, Hanley Energy have successfully completed over 25 halls
